Interactive Phonics Program

The LevelUp interactive phonics program provides a systematic phonics practice that builds students' skills in phonemic awareness. The program follows a complete scope and sequence of phonics skills. Students progress through a fun, effective series of interactive phonics ebooks that include guided instruction on individual skills, visually appealing video and illustrations, professionally narrated audio elements, interactive practice and activities, and positive reinforcement through LevelUp rewards. The LevelUp interactive phonics program has been carefully designed and reviewed by elementary classroom teachers, literacy specialists, and educational technology developers to ensure an educationally sound and engaging experience for students.
